Indusface Product Update

Nov 2015

IndusGuard Web Version 3.5.5

NEW

What's New ?

The new features that have been added with the update.

1 **Alerts on Zero Threats**

You will get notifications in report and dashboard even when no vulnerability or malware threat is found during the malware monitoring scanning. It keeps you updated on current security posture.

2 **IP and corresponding URL Mapping**

The vulnerability assessment report will include details on IP belonging to a specific URL. The feature will make scanning reports more precise, saving time in taking the mitigation steps.

What's Better ?

The enhancements to improve security and usability.

1 **CVSS Field In Report**

IndusGuard Web customized dashboard reports now include vulnerability severity based on Common Vulnerability Scoring System (CVSS). This will help you prioritize response and resources to threats accordingly.

Indusface Product Update

IndusGuard WAF Version 3.0.0

NEW

What's New ?
The new features that have been added with the update.

1 **Improved Threat Management**

With smart threat prevention design, WAF identifies threat and associates it with IPs, session IDs, and machine fingerprint. A risk score is generated and then tied to specific identities for instant, more accurate blocking.

What's Better ?

The enhancements to improve security and usability.

1 **Unique CWE ID for every rule in CRS**

WAF dashboard will now show Common Weakness Enumeration (CWE) associated with every rule. This allows your team to understand what threats are prevented with specific rule set.

2 **Better False Positive Protection**

With newly written rules to eliminate false positives, WAF is more efficient and accurate in blocking only real threats to your applications and keeping real users unaffected.

Other Fixes

1 **Security Patch Updates**

WAF has also been patched for several small bugs in the system. These regular updates help us make it stronger internally and prevent attempts to bring our services down. It also improves uptime and provides you uninterrupted services.
