

Case Study:

About HDFC Life

HDFC Life is one of the leading life insurance companies in India offering a range of individual and group insurance solutions that meet various customer needs such as Protection, Pension, Savings & Investment and Health, along with Children's & Women's Plan. It is the first insurance company to make policy buying experience completely online.

CHALLENGE

- Mandated by the board to leverage online channels to service customers, partners and agents
- With a strong online presence, they had an increasing concern over the security posture of the company
- Needed a way to quickly patch known open vulnerabilities
- Had no expertise to patch open vulnerabilities in legacy systems in timely manner
- Existing WAF was unable to block policy violation as well as frequent DDoS attacks
- Concern over possibility of application DDoS attacks leaving portals un-available creating serious impact to revenue
- Concerned over constant exposure to DDOS attacks and new vulnerabilities
- They needed a solution with an ability to handle more than 10M hits/day and one that is scalable
- Were concerned over exposure of sensitive customer data due to application layer vulnerability leading to compliance/legal issues and severe brand damage

SOLUTION

- Indusface TAS which provides continuous detection of known vulnerabilities including business Logic errors using Indusface WAS
- Immediate and accurate Protection of known vulnerabilities using Indusface WAF including custom rules to patch legacy systems
- Round the clock expert monitoring of web applications to detect and mitigate Application DDoS Attacks
- On-Demand reports and view of vulnerabilities & attacks
- A solution which was able to provide proof of vulnerability and extend support for the team to facilitate timely corrective action
- Hybrid model ensuring the best of automated scanning combined with manual testing, covering an internal and external assessment of vulnerabilities
- Protection against DDOS attacks
- 24/7 support for expert help on security

Testimony

HDFC Life:

Indusface has proved to be a valuable security partner with its Total Application Security solution. Their 'detect-protect-monitor' package handles security worries so we can focus on improving services for our customers. Vulnerability detection, attack blocking and near real-time reports are some of the key differentiators that we enjoy with them. The web application scanning and web protection combination has ensured that we are protected from highly increasing threat vectors.
