Total Application Security
Premium

Integrated Web Application Security
Solution To Detect, Protect & Monitor

PRODUCT OVERVIEW

Indusface Total Application Security Premium simplifies security by providing web application scanning and web application firewall with continuous expert monitoring of traffic and rule violations. It helps businesses avoid hiring separate web application security team by providing regular updates and detailed, actionable reports for taking better security decisions.

Indusface Web Application Scanning Premium detects OWASP Top 10 and WASC vulnerabilities along with complex business logic flaws. It also includes Indusface Web Application Firewall to mitigate vulnerabilities and complex application DDoS attacks.

Available as a fully-managed service, Indusface Total Application Security Premium allows 24 × 7 monitoring and support to analyze and block attacks while maintaining zero false positives.
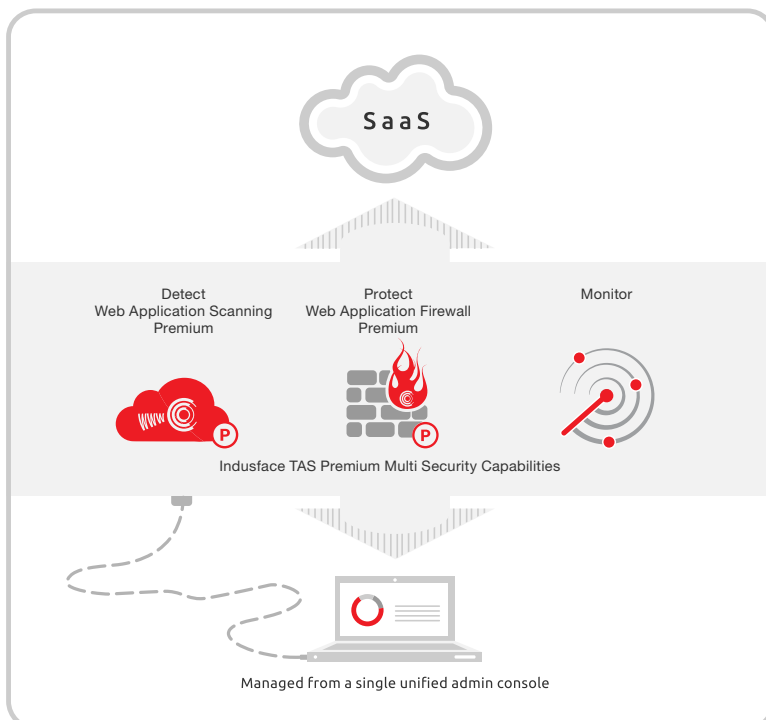

Unique Features

- Continuous detection, protection, and monitoring
- Enhanced application DDoS mitigation
- Real-time Incident monitoring, response and reporting
- Zero false positives

Software-as-a-Service (SaaS)

- Pay as you go model

Compliance Support

- PCI DSS 6.6

We appreciate the quality of Indusface WAF and related services delivered to us and would recommend that Indusface can be entrusted with similar job for any prospective customer without hesitation

Monitor

Indusface TAS Premium Multi Security Capabilities

Managed from a single unified admin console

DETECT

Continuous Web Application Scanning

Daily or on-demand web application scanning identifies OWASP top 10 risks

Found vulnerabilities are reported through the informative dashboard

Business Logic Vulnerability Detection

Extensive auditing for application specific business logical vulnerabilities

Validated and manually tested by certified security experts

Malware Monitoring

Detection of malware, worms, and other application infections

Constant notifications and alerts to the website owners and operators

Blacklisting & Defacement Protection

Indusface WAS Premium helps keep website off the blacklisting databases

It also helps prevent unwanted changes to deface pages

Proof-of-Exploitation

Receive up to five expert-validated demonstrations of how hackers can exploit vulnerabilities

Get better understanding of your security weaknesses

PROTECT

Continuous Application Protection

Continuous breach prevention against OWASP Top 10 and WASC TC v2.0

Block bot attacks

IP reputation and geolocation based protection

Enhanced Application Protection

Custom rules by experts for complex attacks

Protection against business logic vulnerabilities, unauthorized user behavior

Application DDoS Mitigation

Block bots specifically designed for application DDoS attacks

Prevent clickjacking script injections

Mitigate HTTP connection abuse

PCI 6.6 Compliance

Comply with PCI DSS requirement 6.6

Ensure cardholder's safety on the website

MONITOR

Continuous WAF Rule Modulation to ensure Zero False Positive

Continuous monitoring to validate efficiency of custom rules

Ensure that legitimate users are never blocked by the web application firewall

### Real-time Incident Monitoring,Response and Reporting

Instant reporting and mitigation support for all types of application exploitation incidences

24 × 7 email and call support for configuration and tuning

Analyze & Block Enhanced Application DDoS Attacks

Detailed inspection of application traffic to analyze and block app DDoS

Prevention of bandwidth theft, server misutilization and Slowloris
