

# Indusface WAS

Fully Managed DAST and Pen Testing  
Platform for Websites, Mobile Apps & APIs.

- Map your external attack surface
- Scan for OWASP Top 10, SANS 25 and WASC vulnerabilities
- Reduce vulnerability fatigue with AcuRisQ
- Find business logic vulnerabilities with manual penetration testing
- Uncover platform/OS level vulnerabilities on infrastructure
- Monitor for defacements and scan for malware continuously

**Trusted by 5000+ Customers across 95 Countries**

## Customer Testimonial

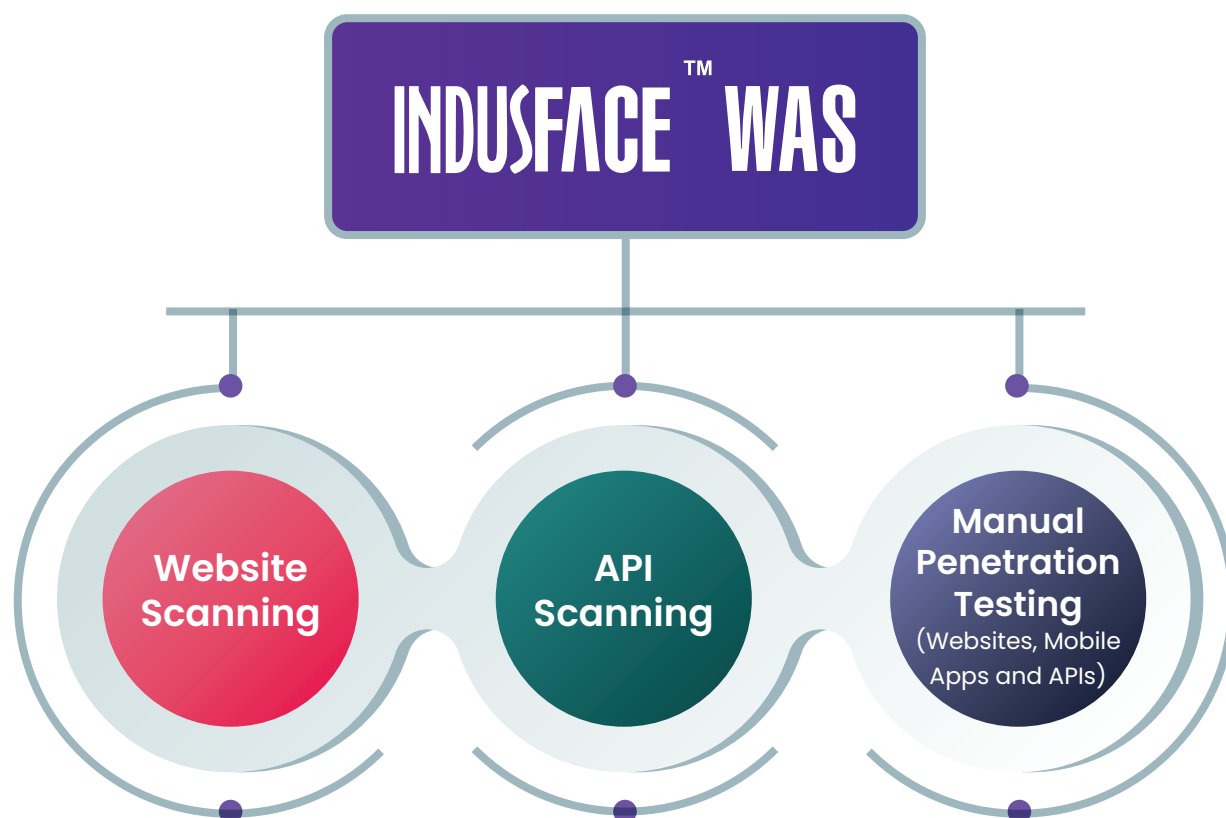

Indusface is a comprehensive solution for web application scanning as it comes fully loaded with intelligent automated scanning engineering that is a highly scalable global platform on which companies can bank their application security upon, gaining 365 days of continuous protection. Its hybrid security methodology provides superior vulnerability detection along with high quality expert remediation, thus helping to effectively secure and safeguard our applications online.

CISO, HDFC Bank

AppTrana's hybrid approach to web application penetration testing provides rich in-depth automated scanning technology with human intelligence which helps address the most challenging web security issues on a daily basis. This product has a unique centralized vulnerability management facility which gives us a single view of our security posture, thereby enabling us to effectively manage vulnerabilities using a single management dashboard

Jayantha Prabhu, CTO, Essar Group

# Website Scanning

## **Vulnerability Scanner – Check Website Security Comprehensively for OWASP Top 10, SANS 25 Threats and More!**

Website security scanning (DAST), combined with malware monitoring and infrastructure scanning, ensures all classes of vulnerabilities are identified immediately in a single place.

Find all kinds of OWASP Top 10 threats, such as SQL Injection (SQLi), Cross-Site Scripting (XSS), Cross-Site Request Forgery (CSRF), and others, before the hackers do.

## **AcuRisQ – Auto-Prioritise Vulnerabilities That Pose the Highest Risk to Your Business**

Along with the CVSS scores, Indusface WAS goes deeper into each of your business assets and helps you with a priority list of ‘risk-based vulnerability metrics’ that may pose the highest business risk if probed by attackers.

## **Asset Discovery**

Map the external attack surface, including websites, mobile apps and APIs for your security audit needs. Improve organisational governance as security, IT, and product teams now look at a single source of truth.

Conduct vulnerability assessment and penetration testing (VAPT) on the identified assets for vulnerabilities with a single click

## **Penetration Testing**

Complement the automated scanning with manual pen-testing, where security experts identify business logic and other hidden vulnerabilities for websites and Apps. \*Complementary pen-testing and one revalidation is provided as part of Indusface WAS Premium plans.

## **Scan Website for Malware and Identify Defacements**

Identify malware infection and defacements in real-time using an intelligent scanning system that checks for parameterized deviations in various parts of the page including DOM, internal links, JS scripts, and audio-video and others.

## Authenticated Scans

Perform deep and accurate assessments of your systems with authenticated scans, uncovering vulnerabilities that may be visible only in the case of an authenticated user.

## Ensure No Parts of Your Application Go Unscanned

No matter the framework, language, or technology used, our automated website security checker with its authenticated/gray box scan feature discovers all places that other scanners cannot, including:

- Single-page applications (SPAs)
- Script-heavy sites built with JavaScript and HTML5
- Password-protected areas
- Complex paths and multi-level forms
- Unlinked pages

## SwyftComply

Onboard the applications on AppTrana WAAP and autonomously patch all critical, high and medium level vulnerabilities. Get a zero vulnerability report for compliance within 72 hours.

# API Scanning

## API Discovery and Documentation Support

Indusface provides support to help you identify your existing, shadow, rogue and zombie APIs. Get assistance in generating an OpenAPI specification file (Swagger 3.0) with pre-filled details.

## DAST with Manual Penetration Testing

Infinite API Scanner, augmented by human guidance, ensures the best use of the API definition to uncover a wider range of vulnerabilities. Along with the OWASP top 10 for APIs, detect business logic vulnerabilities with embedded manual penetration testing.

## Remediation Guidelines

Empower developers with detailed guidelines to fix vulnerabilities using comprehensive reporting structures.

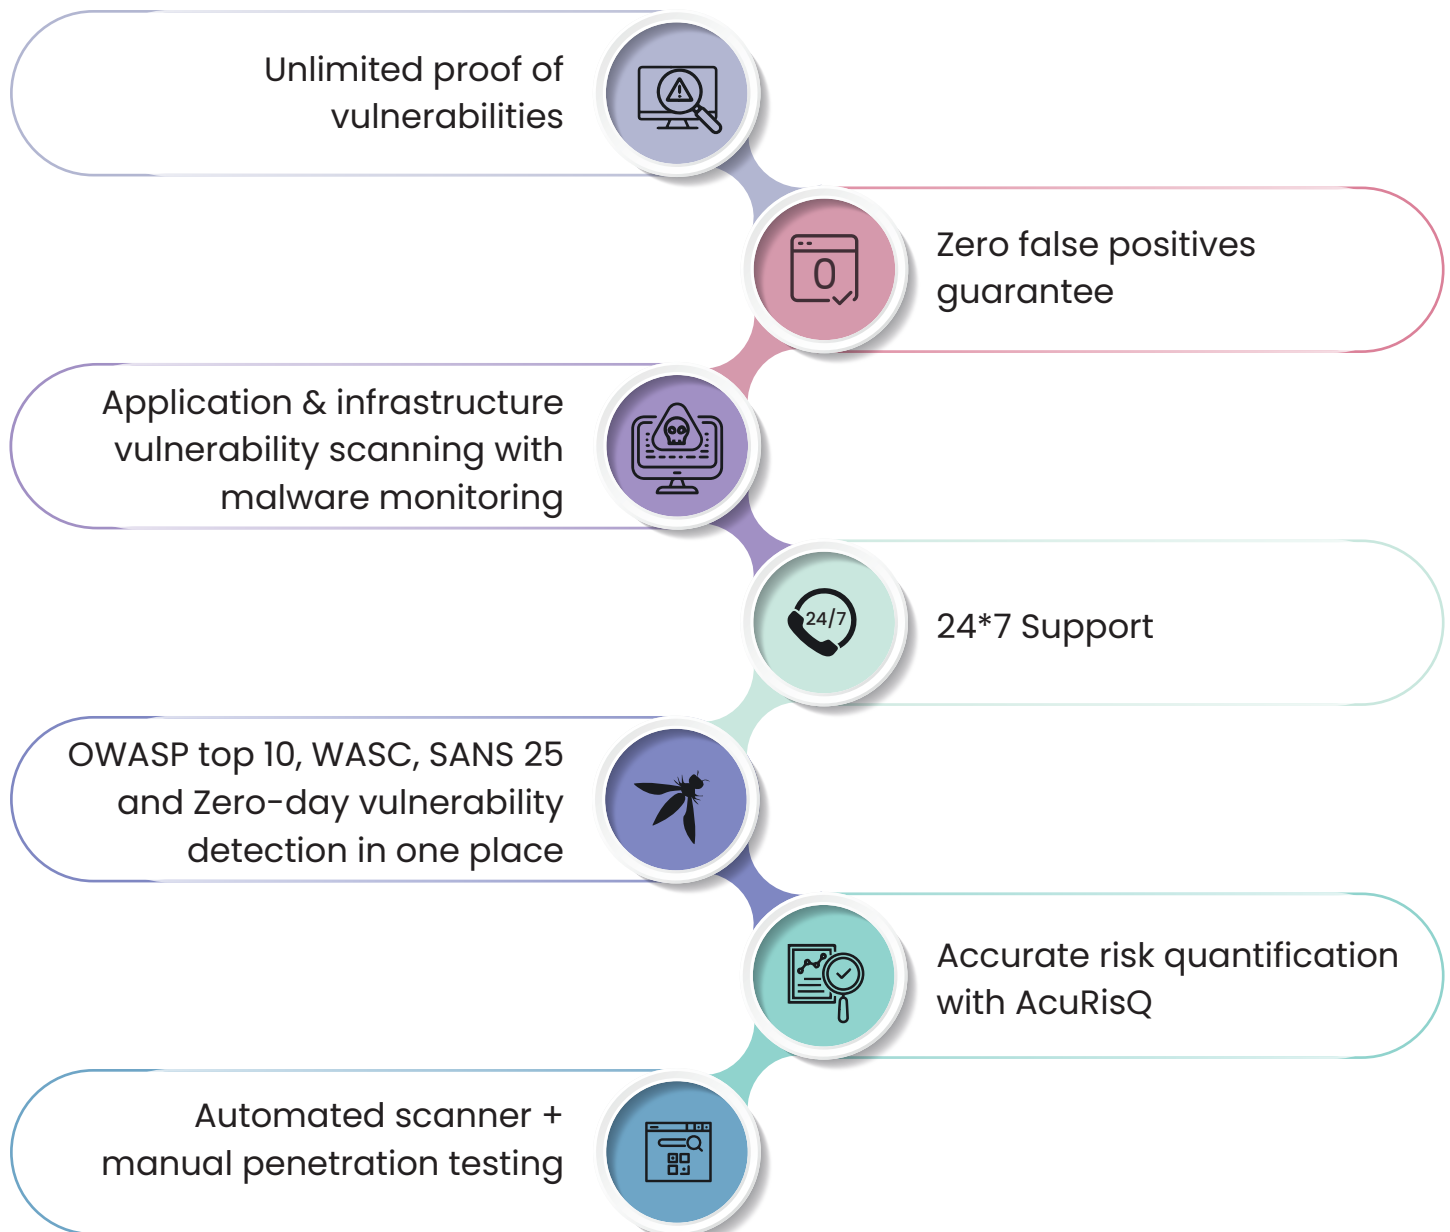

## Plugin Based Architecture

With pluggable modules, pen testers and in-house security teams can write scripts to automate security test cases.

## API Protection

Onboard the selected APIs on AppTrana WAAP. Protect them from DDoS and bot attacks by deploying positive and negative security models on the APIs.

## Unique Value Proposition of Indusface WAS

## Feature List

### Web Application Security Scanning

Key Features	Benefits	Advance	Premium
		\$59/App/Month	\$199/App /Month (Billed Yearly)
Asset Discovery			
External asset discovery	Asset discovery of web & mobile apps and API Hosts (Subdomain, IP, Data Center, Site type, TLD)	Yes	Yes
Unlimited on-demand scans	Scheduled automated scans	Yes	Yes
Automated Web Application Security Scanning			
Managed application security scanning	Indusface WAS automatically scans your site for OWASP Top 10, PCI DSS 6.5.x, SANS Top 25 Vulnerabilities and more	Yes	Yes
Full support of HTML5 , AJAX and JSON	Support to scan JSON , AJAX and HTML5 based sites	Yes	Yes
Remediation guidance to fix vulnerabilities	Get detailed information on how to fix the vulnerabilities	Yes	Yes
Guided scans	Guided scans can be enabled to ensure automated scans reaches pages that other scans cannot	Yes	Yes
Guided Authenticated scans	Recorded steps could be automated to perform guided scans	Yes	Yes
Authenticated scans	Provide authentication details and have scans be done behind authenticated pages	Yes	Yes
Proof of concepts	Get proof of concept for the vulnerabilities, enabling teams to prioritise work on right vulnerabilities	5	Unlimited
Automated False Positive Removal	Scan results are manually verified and false positives are removed for Critical & High vulnerability automatically	No	Yes
Pen-testing by experts*	Have experts ethically hack your sites and find business logic vulnerabilities	No	1
Revalidation Scans	Vulnerability revalidation scan to verify if the applied patch is working properly	Yes	Yes
Out of band vulnerability detection	Ability to detect vulnerabilities that are determined out-of-band and not based on response to a request	Yes	Yes
Daily scans	Ability to schedule automated scans based on need including daily scans	Add-On	Add-On
Platform scans	Identification of platform level vulnerabilities	Yes	Yes
Network scans	Identification of OS/Infra level vulnerabilities	Yes	Yes
Open port scans	Identification of all Open-ports part of infrastructure	Yes	Yes
AcuRisQ	Get a list of prioritised vulnerabilities that pose the highest business risk	Yes	Yes
Malware Scans			
Advanced crawler for malware	Advanced crawler that helps crawl pages through malware scanner to identify malwares	Yes	Yes
Blacklisting detection	Ensures blacklisting tracking on popular search engines (Google, Bing, Yahoo) and other platforms	Yes	Yes
Foreign link	External URL blacklisting / reputation check helps you to protect your customers from visiting "hacked" or "infected" applications which can potentially transfer malware into your applications	Yes	Yes
Deterministic malware detection	Continuous monitoring of malware attack vectors and sophistication of newly discovered malware that have been effectively used and deployed by hackers	Yes	Yes

Key Features	Benefits	Advance	Premium
		\$59/App/Month	\$199/App /Month (Billed Yearly)
Defacement detection	Checks your application changes and detects possible defacement changes	Yes	Yes
Malware code Snippet	Detects dead or inactive malware by monitoring external JavaScript and hidden iframes placed on an application	Yes	Yes
Continuous Malware & Defacement Scans	Scans done every 30 mins and FPs removed before a customer is notified in case of defacements	No	Yes
Other Features			
Centralized dashboard	Centralized dashboard for management of vulnerabilities of assets.	Yes	Yes
Executive report	Canned reports for executives that gives trends across various assets and actionables	Yes	Yes
Groups	Ability to create groups and assign assets to various groups based on business needs	Yes	Yes
Detailed reports	Detailed asset level reports for various scans.	Yes	Yes
Multi-user	Ability to create any number of users based on business need	Yes	Yes
Flexible reporting	Ability to create customized reports based on business need and create reporting schedules	Yes	Yes
Trend graph	Trend graphs across various assets and scans are automatically provided	Yes	Yes
Role based administration	Customizable RBAC to ensure users are provided rights based on need	Yes	Yes
Support	24*7 unlimited e-mail support. Dedicated on call support during business hours. Prompt response and resolution turnaround time on support query requests	Yes	Yes
SIEM	SIEM integration with any SIEM providers for gathering real-time insights and alerts for swift threat response	Yes	Yes
SAML Integration/SSO	Sign in to the portal with your existing corporate credentials from any device without compromising security	Yes	Yes

## API Scanning

Key Features	Benefits	Advance	Premium
		\$59/App/Month	\$199/App /Month (Billed Yearly)
Asset Discovery			
Managed API security scanning	Detect OWASP API Top 10 vulnerabilities with automated API Scanning	Yes	Yes
Full support of JSON	Support to scan JSON based APIs	Yes	Yes
Postman files	Ability to parse Postman files and scan APIs to ensure maximum coverage	Yes	Yes
Creation of Postman files	Postman files for APIs are created by Indusface services team	Add-On	Yes
Remediation guidance to fix vulnerabilities	Get detailed information on how to fix the vulnerabilities	Yes	Yes
Proof of concepts	Get proof of vulnerabilities, to enable teams to work on right vulnerabilities effectively	5	Unlimited
Automated False Positive Removal	Scan results are verified manually and false positives are removed for critical & high vulnerability automatically	Yes	Yes
Pen-testing by experts*	Have experts ethically hack your applications and find business logic vulnerabilities	No	1

Key Features	Benefits	Advance	Premium
		\$59/App/Month	\$199/App /Month (Billed Yearly)
Other Features			
Centralized dashboard	Centralized dashboard for management of vulnerabilities in assets & APIs	Yes	Yes
Executive report	Canned reports for executives that gives trends across various assets and actionable steps	Yes	Yes
Groups	Ability to create groups and assign assets to various groups based on business needs	Yes	Yes
Detailed reports	Detailed asset level reports for various scans	Yes	Yes
Multi-user	Ability to create any number of users based on business need	Yes	Yes
Flexible reporting	Ability to create customized reports based on business need and create reporting schedules	Yes	Yes
Trend graph	Trend graphs across various API scans results are automatically provided	Yes	Yes
Role based administration	Customizable RBAC to ensure users are provided rights based on need	Yes	Yes
Support	24X7 unlimited e-mail support. Dedicated on call support during business hours. Prompt response and resolution turnaround time on support query requests	Yes	Yes
SAML Integration/SSO	Sign in to the platform with your existing corporate credentials from any device without compromising security	Yes	Yes

Indusface is a leading application security SaaS company that secures critical Web, Mobile, and API applications of 5000+ global customers using its award-winning fully managed platform that integrates web application scanner, web application firewall, DDoS & BOT Mitigation, CDN, and threat intelligence engine.

Indusface, funded by Tata Capital Growth Fund II, is the only vendor to receive 100% customer recommendation rating three years in a row and is a global customer choice in the Gartner Peer Insights™ Web Application and API Protection (WAAP) Report 2023. Indusface is also a “Great Place to Work” 2022 Winner in the Mid-Size category in India and is PCI, ISO27001, SOC 2, GDPR certified and has been the recipient of many prestigious start-up awards.
