IndusGuard Web Advanced

Continuous application security testing

PRODUCT OVERVIEW

IndusGuard Web Advanced provides continuous web application scanning to detect and report application vulnerabilities. Offered as an independent SaaS product, it helps discover and manage OWASP top 10, WASC vulnerabilities and malwares risks by reporting them consistently on our dashboard in real-time.

With blacklisting and defacement detection, it ensures that your public-facing application do not get hacked and damage brand reputation. IndusGuard Web Advanced is easy-to-deploy and also covers multiple security demands including vulnerability assessment, application auditing, and malware monitoring.
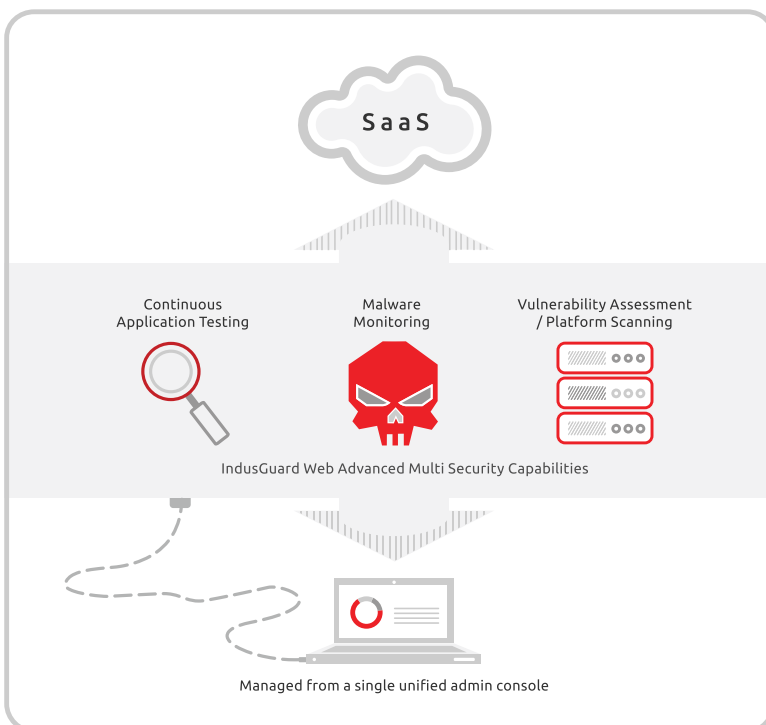

INDUSFACE ™

Unique Features
- Dynamic Application Security Testing

FEATURES

Continuous Application Testing
- Daily or on-demand web application scanning to detect vulnerabilities
- Comprehensive security audit to get security posture of multiple web applications

OWASP Top 10 and WASC Detection
- Efficiently detect most common application vulnerabilities validated by OWASP and WASC
- On-going detection of new vulnerabilities as a result of application changes and updates

Zero False Positives
- Removal of any potential false positives that are found from scanning

Malware Monitoring
- Ongoing monitoring of malware attack vectors and sophistication of newly discovered malware that have been effectively used and deployed by hackers
- Also detects dead or inactive malware by monitoring external JavaScript and hidden iframes placed on an application

Blacklisting Detection
- Ensures blacklisting tracking on popular search engines and other platforms
- External URL blacklisting check helps you to protect your customers from visiting "hacked" or "infected" applications which can potentially transfer malware into your applications

Defacement Protection
- IndusGuard Web Advanced continuously checks your application changes and detects for possible defacement changes
- Daily defacement checks protect the brand, credibility and reputation of an organization

Proof-of-Concept
- Up to 5 proof-of-concepts to be provided if required for proof of vulnerability exploitation and remediation

Informative Dashboard
- Comprehensive synopsis of reported vulnerabilities and malware along with support options in pre-defined report formats

- Customized reporting feature allows a user to create custom reports based on desired fields and format

IndusGuard Trust Seal
- Exclusive IndusGuard seal on your website certifying daily web application scanning
- Increases trust in users, visitors, and consumers in your web security

> *IndusGuard is a comprehensive solution for web application scanning as it comes fully loaded with intelligent automated scanning engineering that is a highly scalable global platform on which companies can bank their application security upon, gaining 365 days of continuous protection. Its hybrid security methodology provides superior vulnerability detection along with high quality expert ...*
