

IndusGuard Web Premium

Continuous, in-depth and managed application security testing

PRODUCT OVERVIEW

IndusGuard Web Premium provides comprehensive dynamic application security testing (DAST). It combines automated web application scanning to detect OWASP Top 10 and malwares along with certified security expert validation for comprehensive analysis on business logic flaws and other complex vulnerabilities. Our managed security team also provides in-depth verification and demonstration of business impacts of the complex vulnerabilities.

IndusGuard Web Premium is offered as a SaaS-based solution, and provides real-time reports and summaries based on type and severity of vulnerabilities through the dashboard. It is designed to help organizations manage security across multiple web applications with daily or on-demand auditing, defacement protection and blacklisting detection.

Unique Features

- Continuous Dynamic Application Security Testing
- Managed by Security Experts
- Business Logic Checks
- Zero False Positives

Software-as-a-Service (SaaS)

- Pay as you go model

Technical Support

- Unlimited Proof-of-Concept
- Call and Email Support

“ IndusGuard’s hybrid approach to web application penetration testing provides rich in-depth automated scanning technology with human intelligence which helps address the most challenging web security issues on a daily basis. This product has a unique centralized vulnerability management facility which gives us a single view of our security posture, thereby enabling us to effectively manage ... ”

Vishal Salvi, CISO & VP, HDFCBank

FEATURES

Continuous Application Testing

- Daily or on-demand web application scanning to detect vulnerabilities
- Comprehensive security audit to get security posture of multiple web applications

Business Logic Vulnerability Checks

- Extensive auditing for application specific business logical vulnerabilities
- Support on functional understanding of logical flaws for in-depth security audit

OWASP Top 10 and WASC Detection

- Efficiently detect most common application vulnerabilities validated by OWASP and WASC
- On-going detection of new vulnerabilities as a result of application changes and updates

Zero False Positives

- Removal of any potential false positives that are found from scanning

Malware Monitoring

- Ongoing monitoring of malware attack vectors and sophistication of

newly discovered malware that have been effectively used and deployed by hackers

- Also detects dead or inactive malware by monitoring external JavaScript and hidden iframes placed on an application

Blacklisting Detection

- Ensures blacklisting tracking on popular search engines and other platforms
- External URL blacklisting check helps you to protect your customers from visiting “hacked” or “infected” applications which can potentially transfer malware into your applications

Defacement Protection

- IndusGuard Web Advanced continuously checks your application changes and detects for possible defacement changes
- Daily defacement checks protect the brand, credibility and reputation of an organization

Proof-of-Concept

- Up to 5 proof-of-concepts to be provided if required for proof of vulnerability exploitation and remediation

Informative Dashboard

- Comprehensive synopsis of reported vulnerabilities and malware along with support options in pre-defined report formats
- Customized reporting feature allows a user to create custom reports based on desired fields and format

Managed by Security Experts

- Security experts mimic exploitations from real hackers to help identify risks in real-time
- Demonstration of business impact of vulnerabilities exploiting series of logical weaknesses within application

IndusGuard Trust Seal

- Exclusive IndusGuard seal on your website certifying daily web application scanning
- Increases trust in users, visitors, and consumers in your web security

Total Application Security that Detects, Protects and Monitors

We are industry's first truly integrated 'Total Application Security' provider that 'Detects, Protects & Monitors' our customers' applications on a continuous basis backed with Zero False positive promise. Our suite of products includes: IndusGuard Web- Dynamic Application Security Testing (DAST) solution for Web Applications, IndusGuard WAF- Fully managed Web Application Firewall and DDoS protection solution, and IndusGuard Mobile- Dynamic Application Security Testing solution for Mobile Applications.
