

Indusface Product Update

IndusGuard WAF Version 2.5.0

WHAT'S NEW ?

The new features that have been added with the update.

- 1 Instant Geolocation Blocking**
IndusGuard WAF now helps you select countries and block IPs from those geolocations right from the dashboard. It offers better control over regional traffic with instant rule to block it. 
- 2 Improved Vulnerability Reporting**
Our updated security reports will provide better insights on policy violations by linking it with the existing vulnerability reports. It will help monitor threats for better security decisions. 
- 3 Enhanced Protection with Core Rule Set Update**
The WAF 2.5 update also brings additions to core rule set for protection against advanced SQL injection and DDoS attacks. 
- 4 OWASP Top 10 Mapping**
MSS report will provide a mapping of policy violations to OWASP Top 10 categories to give a better insight w.r.t categories of attacks happening on your applications 

WHAT'S BETTER ?

The enhancements for improving security and usability.

- 1 Faster Request Turnaround**
An improved policy configurator for backend MSS team to manage and update policies and this allows us to serve you faster and improve request response time. 
- 2 Detailed DDoS Reporting**
IndusGuard WAF reports will feature detailed distributed-denial-of-service insights on attacks with actions taken to prevent them. It will help you understand web app security posture. 

Indusface Product Update

- 3 Enhanced Protection from SQL and XSS**
Several updates in core rule set based on that will make WAF stronger against common Layer 7 attacks.

- 4 Enhanced AWS Auto Scaling Support**
The improved auto scaling support for AWS adjusts usage up and down based on application traffic variations so you pay only for what you use.

OTHER FIXES

- 1 Security Patch Updates**
The newer version of WAF also includes various security patches that make it strong internally and prevent attempts to bring our services down. It helps us maintain uptime and provide you continuous services.

Indusface is an award-winning SaaS-based total application security company with more than 700 enterprise customers spread across 17 countries who trust us with their web and mobile application security.
