

Large Online Travel Retailer

CHALLENGE

- Website is complex, dynamic, selection driven and huge.
- Proactive daily security monitoring of website to keep website free from vulnerabilities and malware was necessary.
- Detect logical weaknesses and rectify them, aiding in protecting online brand image and preventing any possible online frauds.
- Requirement of a single platform for vulnerability management to manage its website.

SOLUTION

- Zero touch – SaaS based web security monitoring solution - IndusGuard
- Daily malware, application and vulnerability scanning with enterprise feature dashboard and customized incident management.
- The complex nature of the website required a customized solution for:
 - scanning only 'priority' tag pages.
 - developing customized scripts to scan 'manual selection' driven pages.
- Business logic checks using manual skills and techniques.
- Daily vulnerability, malware and business logic issue findings provided under a single list of alerts
- Unlimited proof of vulnerabilities exploitations - support for a year
- Hybrid model ensuring the best of automated scanning combined with manual testing, covering an internal and external assessment of vulnerabilities
